

Purpose and scope

This policy governs refund decisions for orders fulfilled to Singapore delivery addresses.

Principles

Verify the order record, delivery state, customer identity, and case notes before making a recommendation. Never infer missing dates.

Evidence

Accept clear photographs, delivery-partner damage annotations, or an assessment recorded by an approved service centre.

Ownership

Frontline support may apply the standard outcomes in this policy. Exceptions require Support Operations approval.

LOOK AHEAD

The eligibility thresholds are presented in the decision flow on the next page.

Damaged-delivery eligibility

Use the decision flow after confirming that the order was delivered and the reported item matches the order record.

CURRENT SG DECISION FLOW

Use verified delivery and report dates

In-transit orders: do not use this flow. Follow the shipping investigation guide.

Visual content contains policy facts not repeated in selectable text.

Operational checklist

Complete each check before communicating a final outcome to the customer.

1. Verify

Confirm order ID, customer, delivery date, report date, and affected item.

2. Record

Attach the evidence and summarize the damage without adding unsupported conclusions.

3. Resolve

Apply the outcome from Figure 1 and record the policy version used.

4. Escalate

Send ambiguous evidence, suspected misuse, or safety issues to Support Operations.
